

Connected business

Metro Access Circuit

As a Carrier, you can now provide your customers with access to local or regional connectivity through Liquid Telecom's Metro Access Circuit. Your customers will experience the benefits of increased bandwidth, reliability and scalability that our highly meshed Metro Ethernet Network provides at scalable pricing per Mbps.

Benefits:

Our award winning, carrier-grade fibre network spans across major African cities and we have the largest fibre network footprint in Africa that covers ten of the fastest growing economies.

- **A trusted network**, we own and operate our own expansive and highly meshed network which means you can trust us to provide your clients with guaranteed service availability and delivery
- **We are the carriers' carrier of choice** and work with you in a variety of partnership models to fulfill your unique needs and strategies
- **Putting your clients first**, we offer a choice of access medium and scalable bandwidth to meet your customers' needs
- **Fixed pricing provides** predictability, allowing you to focus on connecting and managing your customers

Features:

- Support fibre as well as other access methods
- Fibre offers various interfaces
- Flexible bandwidth options
- Point-to-point and point-to-multipoint dependent on technology
- Resiliency options

Support

Liquid Telecom has physical presence in several African countries, giving you access to people on the ground who understand your market and needs.
